Step 1

AI Cards

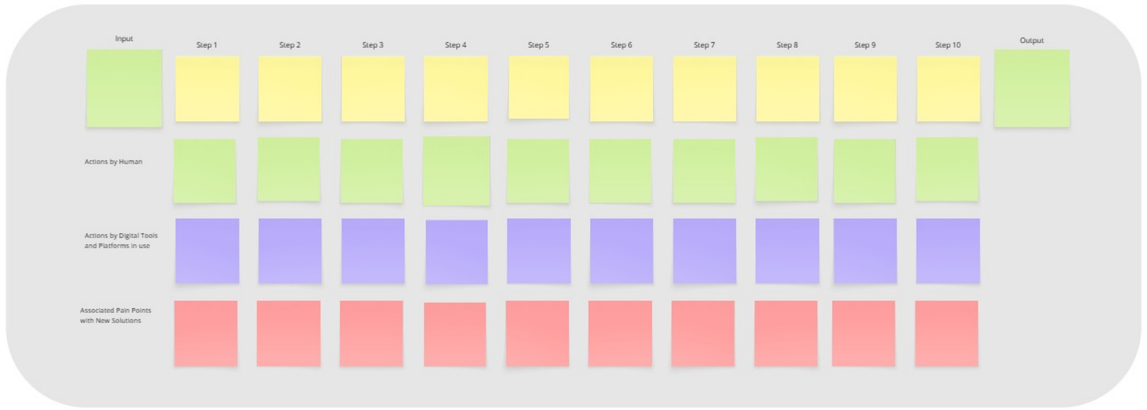

Risk Mitigation Cards

Name of the Step

Copy this from the main board (it is ok to copy just the primary process / step under consideration)

2 minutes

Bring all relevant 33A AI CARDS® for applying AI to selected process or step here and then vote using the red dots

15 minutes

Move the 3 most relevant AI cards down (This is not a fixed number, but usually works best to not exceed 3).

5 minutes

Describe how would you use the selected AI card to enable our Process with AI

5 minutes

Create a Summary of how AI changed the workflow (summarize the above 3 post it)

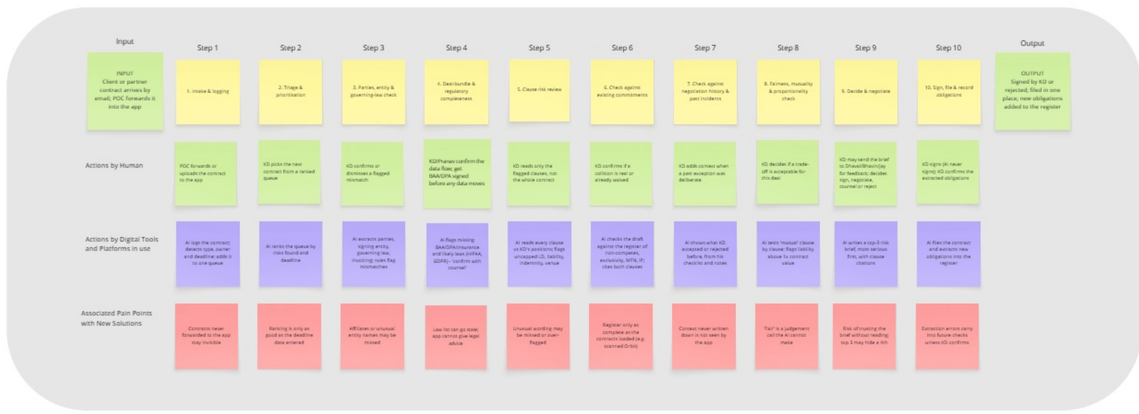

5 minutes

Make changes in the step here:

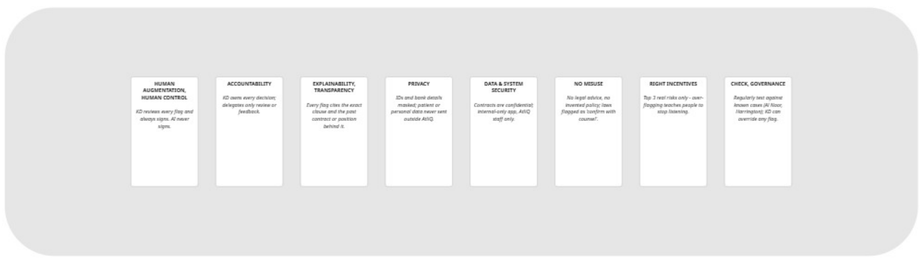

1. Move your proposed AI process to Actions by digital tools & platforms
2. Accordingly, update the Actions by Human as per what's left for Human to do.
3. For the new solution, discover some of the pain points which would be associated to it.

5 minutes

Select the relevant Ethical Risk Cards to the gray area which are relevant to the process / step under consideration

10 minutes

Describe how would you mitigate the above highlighted risks

10 minutes

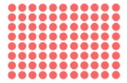

Process Board

Name of the process Contract Lifecycle at AtliQ

Fill up the Yellow cards with process subsets, and cards below by action by humans, responsibilities on tools and platforms, and current pain point. Then vote for the most painful areas using red dots.

30 minutes

	Input	Step 1	Step 2	Step 3	Step 4	Step 5	Step 6	Step 7	Step 8	Step 9	Step 10	Output
	INPUT Client or partner contract arrives by email (their paper, or AtliQ's paper to a partner) to KD, Dhaval, Bhavin or Jay	1. Intake & logging	2. Contract Triage	3. Parties, entity & governing-law check	4. Deal-bundle & regulatory completeness (BAA, DPA, HIPAA, GDPR, local privacy laws)	5. Clause risk review (LOL, liability, indemnity, payment, venue)	6. Check against existing commitments (non-compete, exclusivity, MFN, IP)	7. Check against negotiation history & past incidents	8. Fairness, mutuality & proportionality check	9. Decide & negotiate (sign / negotiate / counter / reject)	10. Sign, file & record obligations	**OUTPUT** Contract signed by KD or rejected, filed, and new obligations recorded
Actions by Human		Client POC forwards email to KD	No owner, order or deadline agreed for the queue (22 Sep queue meeting)	Entity and law checked only within KD's full-read; tracker entry field often blank	No one owns this check; team assumes existing setup covers it (Cavelbridge setup should cover it)	KD reads every clause after 10 pm against his 2024 checklist (2-4 hrs)	KD recalls past deals from memory; hunts email and drives for old contracts	KD recalls what he accepted or rejected before; digs for notes	KD checks if a "mutual" NDA is really mutual; weighs liability vs deal value	KD optionally gets feedback from Dhaval/Bhavin/Jay; big deals to counsel; negotiates by email/phone	KD signs (sometimes on phone); PDF saved wherever; nobody extracts obligations	
Actions by Digital Tools and Platforms in use		Email inboxes; contract tracker sheet (incomplete)	Whiteboard queue	PDF / Word reader; entity fact sheet	Email threads; existing BAA files (Cavelbridge, Intercompany)	KD's 2024 checklist; PDF reader	Email; local hard drive on laptop; phone, Slack, WhatsApp messages	Negotiation notes scattered in email	No tool; relies on the title saying "Mutual" (Meridian, FinService)	Email; phone; outside counsel (Rekha Rao, Calloway Stern)	E-sign app (incl. phone); Drive / Shared Drive / Inbox; tracker sheet	
Associated Pain Points with Current Solutions		Contracts land in 4+ inboxes; 8 drafts missing from the queue	No risk or deadline; 1 week-1 month in queue; ShipStar® (SOS) sat 9 days	Entity/law mismatches missed (Fluxwinds Inc vs Pvt Ltd invoicing)	Patient data went to Pune before BAA (warmspot); no regulatory check	2-4 hrs per contract; late at night; uncapped LOI slips through (Brightwater $23m)	No record of what AtliQ promised; AI Nixor GCC non-compete thought 'expired'	Deliberate exceptions and waved-through terms look the same; positions unwritten	"Mutual" NDAs that aren't (Meridian, FinService); liability out of proportion to value	Counsel slow and costly (5-7 days, needs all contracts); signing under deadline pressure	Signed on phone in 4 misc contracts across 6 locations; tracker wrong	

Consilidate findings from your individual process boards where you applied AI to Airy and automate processes
